A Letter of Appreciation

W. R. Woodford of Cleveland, Ohio, president of the Fair River Oil Company, and vice president of the Fort Smith & Western Railroad company, writes to congratulate the oil men on their recent success in pleasing news in regard to the oil development along his line of road.

"I have been interested in reading what your oil men have had to report in regard to the oil fields at Welečka and around Okmulgee. These are points on our Ft. Smith & Western railroad.

"It looks as though they have found real oil pools in those sections. It has already had a beneficial effect upon our railroad, and I am hoping that the territory between those points will be found to contain considerable oil.

"You have a most wonderful state, and I have always contended it. The railroad is here benefited perhaps more than anywhere, but it is seldom that an official of any of the roads takes the time to mention the fact to the oil men, and that his news is pleasing and reliable. There is a little inside dope connected with the development down that way that would probably be of interest to you.

"When the first well was started at Okmulgee, it was drilled on a 'structure' outlined by a geologist, and it looked good as a venture and was duly boosted from the top of the ground and while we were confident that it was in the right spot, just far enough back from the river, which, by the way, will mark the new pools down that way when once the country is fully drilled up. It was never the less, commended by the association of geologists, who proposed to 'expose' the geologist who had made the location, which fact only strengthened the belief that there was oil to be found here. And, moreover, Mr. Woodford and Mr. Woodford to be interested in the human interest side of the oil game. It is hereby stated that another and a very strong reason why the Okmulgee well got such enthusiastic boosting here, was because of the fact that on the staff of the Midwest & Gulf Refining Corporation, there is a clear-eyed young man who serves success as she and her company has been having mighty poor luck and it was evident that she was due for a change.

"Even in the oil game, 'hunches' sometimes go. (At this desk.) Recently at Belmont park the writer heard a woman bemoaning the fact that she had had a list of all the winners, which was a list of all the winners, and had failed to bet on any of them, and when asked why she did not bet on the winners, she replied: 'You know how it is; before each and every race started somebody would come up with a 'hunch' as for the winner, and my girl was in the stand and, or something like that, and that's the way it goes.'

"The fact is, seriously speaking, that for a long time there has been a recognized fact that the trend pointed directly toward Okmulgee, Welečka, and of course, to other points along the Fair River and Western railroad. To have had the 'dope' right from the start, was something worth bragging about, because other papers with bright and wise oil reporters, immediately took the other side of it, with the result that there was a bonfire of said papers on the streets of Okmulgee, while the 'dope' was recognized as being it when it comes to getting the news and getting it right.

"The Fort Smith & Western should immediately extend its line to Welečka, which has a number of miles on them all as an oil town, whereas it has only one 800-barrel well and two or three dozen starting because of its gift for publicity which means that it is spending money to advertise. It is only a few short years ago that Tulsa sent a booster excursion east, and the people spelled the word 'TULSA' on the banners carried ahead of the band, and wondered whether it meant a breakfast food or a new town. They were not long in finding out that it meant the future center of the oil industry, and certainly no boosters' prophecies ever turned out truer.

"Mr. Woodford should continue out and see us every month or so. He can be assured that his party will be met at Welečka by the town boosters with a band, and then shown the wonderful improvements made since he was here last, and the chances are he will do well to survive the shock—so great has been the change in a few short months.

Natural Gasoline in Motor Fuel.

O. P. Keeney, Tidewater Oil company, Both papers will be followed by an editorial discussion.

The American Petroleum Institute has provided a splendid program for its three-day session. It consists of three general topics as follows:

1. Standardization, Simplification and Improvement of Drilling Methods and Equipment. This subject has been divided into 21 sections covering "The Cementing of Oil Wells," "Physical Qualities of Oil," "Essential Qualities and Analysis of Raw Materials," "Quality of Motor Fuels and the Value of Co-operation and Co-ordination by Industry," "Standardization in the Oil Industry," "What Has Been Done," "Future of the Industry," "Mid-Continent Oil & Gas Assn's Address Regarding," "Pipes for Deep Well Drilling," "Standardization of Cable Tools," and "What Does the Oil Industry Wish to Do About Standardization?" Men, nationally known in the industry, will be in attendance on all subjects which will be followed by general discussion.
2. What is Good Gasoline? Papers by Dr. W. Woodford, Director of Standards and Thomas Midekely, Jr., General Motors Research Corporation. (General discussion.)
3. The Present Status and Prospects of the Petroleum Industry. Paper by Henry L. Doherty, General Discussion.

Kay County Lines Handling Record Breaking Oil Runs

PONCA CITY, Nov. 16.—Statistics given out here by Charles E. Brown, director of the Kayland Oil company in charge of pipelines, that the Kay County Gas company handled 2,047,433 barrels of oil through its lines during the first six months of 1922 on 1,000 subjects, three hundred thousand barrels less than were handled during the entire year of 1921. There has been a considerable increase in the amount handled annually since the start in 1917 when the total amount handled was but 31,848. The total amount handled from January 1, 1917, to June 30, 1922, is 7,719,214 barrels. Mr. Brown shows also that the company has \$2,226,243 invested in pipelines, pumping stations, tanks, telephone lines and other related equipment.

Only One Well Drilling in Barnes Field

PONCA CITY, Nov. 16.—Only one well is drilling at the present time in the Barnes field, the old Barnes pool, and that is the Rieger No. 3 at about one thousand feet. The No. 4 has been abandoned at 2,480 feet, no production being found in either the 2,100 or 2,400-foot sands. The Barnes No. 6, which has reached the sand at 2,300 feet, has been shot at that depth.

Graham Texas Crowded With Men Out of Employment

The following is self explanatory. There are other sections equally crowded with idle men, and although the situation is not as bad as it is in Graham, it is now being severely felt, on account of the cold weather.

If there are other towns that desire a notice similar to that below, they will be given publicity also. The place to look for work is where new wells are being brought in. It is not territory, but it would not do under any circumstances, without having full information, to suggest any given locality. It might be that the situation in Graham is as bad as overcrowded as any of them.

"Graham, Texas, Nov. 11, 1922. EDITOR TULSA WORLD, Tulsa, Okla.

Please publish this for the interest of men who are lacking for work. Graham, South Bend, Herrin City are crowded with idle men, and men are arriving by car and rail every day.

I am sure it would save them money and time to wait for times to get normal again in Texas.

Respectfully,
R. E. KNIGHT.

Slick Well in Tonkawa Field to Go Deeper

Sticks well in the southwest of 25-25-16, located at sand at 2,053 feet, which showed about seven feet of rich oil-bearing sand, but the well will be drilled on to the 2,600-foot sand.

New Well in Wilson County Kansas Shot

The following telegram was received from Fredonia, Kan., Wednesday:

The Peoples Oil & Gas Co. shot its new discovery well today, located on the Steele farm near Coyville, Wilson county, Kan., on account of finding the production in the Wilcox sand. Only a light shot of 20 quarts was used which more than doubled the production. Great interest has been taken by the oil fraternity in this test. The G. P. & G. Oil & Gas Co. extenden it's field by bringing in another big gusher on the Robertson lease which joins the Peerless Oil & Gas Co. property. It is now an assured fact that a large oil and gas field will be opened up in this locality.

Gasser in Young County, Texas

Fultz and Albright No. 1 Carter, McKinney and Williams survey, Young county, Texas, topped the sand at 1,624 feet, drilled two feet in, and produced 19,000 barrels of gas. This is a wildcat well.

Okfuskee County

Parshall Oil & Gas Co. is shut down at 400 feet in the southeast of 25-25-16.

All will have gas tight steel roofs and be painted a battleship gray. All will be located on the existing tank farms, which joins Ponca City on the southwest.

The contract price of each 80,000-barrel tank was \$22,350 in June when the contract was let, whereas in 1920 \$34,700 was paid for a 65,000-barrel tank. The cost of tankage now is \$2,000 per barrel as compared with 53 cents then. It is understood that there has been a considerable advance in material since the contract was let in June of this year.

The Marland company has also completed recently for use in connection with the new pressure slide at the local refinery two 10,000, eight 6,000, two 1,800 and eight 1,200-barrel steel tanks.

Well Is Now Producing Four Ways

PONCA CITY, Nov. 16.—The well recently completed by the Kay Oil company in the Deer Creek district of eastern Grant county, is now producing four ways. The company send in this well to the Oklahoma Natural Gas company, gas from the 3,500-foot sand to the Blackwell Oil & Gas company, and oil from the latter sand to the Producers & Refiners Co. The well is also making about one hundred gallons of casinghead gasoline daily which is being sold to the public.

Producers and Refiners Rushing Work in Raulins Refinery

Work at the P. & R. refinery site in Cushing, Wyo., is being rushed with all possible speed. The Lynch Construction company of Casper is pouring the cement for 18,000-barrel stills and graders for 10,000-barrel tanks and 4 25,000-barrel tanks, besides a number of run-down and other small tanks. The Hammond engineering firm has the contract for erecting the tanks. An 8-inch pipeline for water is being laid from the refinery to the North Platte river, a distance of four and a half miles. The work is being supervised by the P. & R. in the ground supervising construction.

About twenty cottages have been built to take care of the employees of the P. & R. on the pipeline. Hammond Iron works and some of the men of the P. & R. A permanent camp will be built later to house the refinery employees. Work on the pipeline from the Little Lost Soldier field via Wertz and Ferris to the refinery site is being speeded up by the Hope Engineering & Supply Co. Firm well known engineering firm has four Bucyco diggers at work on the line and two pipeline crews working from both ends toward the middle. The line will be approximately 35 miles in length and will be of 6-inch pipe. About 15 miles of trench have been dug and five miles of pipe have been laid on the refinery end and four miles from Lost Soldier through the Wertz camp. There will be two main stations and two booster stations on the line. The initial station will be at Lost Soldier where there will be a large storage tank. Another station will be at Ferris where there will be one 55,000-barrel tank and one 10,000-barrel tank. The booster stations will be midway between Lost Soldier and Ferris and Ferris and the refinery.

Mid-West Pool Okemah

Burk-Hoffield are drilling at 1,550 feet in the center of the east line of the northeast of the northeast of 1-10-9.

Margay Oil corporation has location in the northwest of the northwest of 1-10-9.

Marshall & Midwest has rig in the southwest of the northwest of 1-10-9.

Pure Oil company is drilling at 1,790 feet in the northwest of the northeast of 1-10-9.

Sinclair Oil company is fishing 8-inch casing at 2,755 feet in the southwest of the northwest of 1-10-9.

Empire Gas & Fuel Co. is shut down at 565 feet in the northeast of the southwest of 2-10-2.

Grypey & Empire are fishing 5-inch casing at 1,914 feet in the southwest of the northeast of 2-10-2.

Grypey & Empire are drilling at 1,950 feet in the northeast of the southwest of 2-10-2.

Physician Advises People

"My wife suffered for years with stomach trouble which would not yield to any treatment. She took a dose of Mayr's Wonderful Remedy last Saturday with wonderful results. She has practiced medicine for 29 years and have never seen anything like it before. I have recommended Mayr's Wonderful Remedy to several of my patients and it has cured them of the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis, and it is a relief to all ailments of the stomach and intestines. I have never seen anything like it before. I have recommended Mayr's Wonderful Remedy to several of my patients and it has cured them of the intestinal tract and allays the inflammation which causes practically all stomach, liver and intestinal ailments, including appendicitis, and it is a relief to all ailments of the stomach and intestines. I have never seen anything like it before.
